18/10/2016 418 gram

27/10/2016 . 518 gram

09/11/2016 Joey has been fine till today when in the afternoon he was in pouch shaking violently. Taken inside and sedated with Pamlin and given an injection of Meloxicam. Also started Tribactril injections for treatment of same problem Juna, Zarra, Yagoona has suffered from. Sedation wore off after 4-5 hours, drank 25 mill of lectade. Recovered and put back outside late night. Tribactril injections to continue for 10 days.

11/11/2016 Repeated the same as 2 days prior, shaking violently, heart razing and eyes fixed and staring. Sedated with Pamlin. Recovered although balance and ability to hop is affected.

16/11/2016 834 gram. Still on antibiotics, balance is slowly returning.

23/11/2016 another episode this evening at 7pm, found with heart razing, very hot to touch, salivating and eyes staring open and not focused. Sedated with Pamlin. Recovering by 1am drank 15 mill of lectade. Urine clear and pellets firm and normal. Unable to stand or hold any weight on legs.

24/11/2016 930 gram. Joey had another seizure last night, sedated and recovered as usual within 5 hours. Took to Lismore vet clinic 24/11/ and Nick Jones gassed joey down and took spinal fluid to send to lab for analysis.

27/12/16 Joey found in pen, shaking violently, eyes fixed and body very hot to touch. Sedated with Pamlin and given injection of Meloxicam. Recovered after 5 hours, balance affected, but able to hop.

Since then joey has been fine and at this stage is still doing ok.
