

WIRES Call number 1041482 - nr39687Juna

Red-Necked wallaby Female

Wombaroo with Impact

365gram 25/07/2016 fine cover of fur, very fine featured wallaby, bone structure is also very fine and delicate.

778 10/10/2016 all good.

806gram 13/10/2016 .

1096gram 8/11/2016 Joey has been slightly different in the last 2 days, not as energetic as usual and spaced out look in her eyes. This morning notices a slight shaking of front paws and rapid breathing. Suspect she may be coming down with " virus" that 1046808 - nr37435 - Zarra is suffering from. Also see 1041853 - nr37322 Yugara. Given 0.02 Meloxicam injection and 0.07 Tribactril injection.

9/11/016 taken to Uralba st vet Nick Jones, blood samples taken

11/11/16 Joey was doing well at morning feed hopping around the pen slightly of balance but energetic and drank her bottle and water as usual. Daily Tribactril injections 0.07 ml.

Came out for next fed at 2.20 pm and she was in a coma, eyes staring, shaking violently and heart razing, hot to touch. Pink urine spilling out of cloaca. Day before had notices fine specks of blood on the cotton wool when I toileted her at lunch time, nothing showing later.

She died at 6pm.
